

Amazon Business

Distance Learning Hub Resource Center

VASS is pleased to collaborate with Amazon Business on a new effort to help preK-12 school divisions get essential in-home learning items to students. Amazon Business developed the Distance Learning Hub as a resource center so that our members can continue their educational mission. The Hub includes:

- Prioritized education supplies. Purchase essential education supplies, learn-at-home technology, and shelf-stable foods in the Distance Learning Supplies store. These products are in stock and are expected to arrive in seven days or less. Work directly with Amazon Business to source large quantity orders by utilizing Amazon's supply chain.
- Fast-tracked relief fund allocation. Use Budget Management capabilities to quickly allocate relief funds to schools or teachers. Reduce manual processes, manage spend with pre-purchase approvals, blocked products and spend limits, while tracking to purchasing guidelines.
- Flexible, multi-location shipping. Support the distribution needs of your district by establishing pre-purchase approval workflows for any purchases, and shipping products to multiple locations – including central warehouse locations, drive-in/pick-up locations, or even directly to students' homes – so that essential items get to students and they can resume learning. Use Amazon Business Analytics to track purchases made from the Amazon Business account.

To learn more and connect with an Amazon Business K-12 Customer Advisor, please visit the Amazon Business Distance Learning Hub:
