

Identification of Instructional Gaps

and Student Needs

Named the “Online Learning Innovation of the Year” by EdTech Breakthrough, Istation’s adaptive assessments and instruction are ideally suited to help you meet the following **Virginia Instructional Plan Guidance** components for 2020-2021 Phased Reopening.

Identification of Instructional Gaps and Student Needs

Istation’s adaptive and formative assessments in **reading** and **math** for students in pre-K through 8th grade use key subject domains to screen and identify each student’s mastery of specific skillsets and their progress relative to grade-level expectations. The programs then provide appropriate, engaging, game-like instruction to help the student grow.

For ESL and dual-language students, an authentic **Spanish language-and-culture-specific literacy program** is also available.

Remote Learning

Since Istation’s Indicators of Progress (ISIP™) is a formative assessment, **we offer an at-home option** for schools and districts when conducting remote learning. **Recent research** shows a high degree of validity with the Istation assessment, even when taken at home.

Connecting home and school, Istation creates a **unique program for home-based instruction** that offers teachers and parents a clear view of each student’s progress.

Additionally, **Istation’s Parent Portal** includes a variety of resources to reinforce children’s learning at home, including printable lessons, books and passages, and games appropriate for each student’s progress in the Istation program.

Operational Infrastructure

Istation’s instruction is device-agnostic and available anytime, anywhere. And for those with limited internet connectivity, our app-based technology allows users to keep working offline without losing their work.

Reports are dynamic and real-time, and the student summary reports are ideal for parent-teacher communication and conferences.

New Instruction for All Students

While originally intended for intervention — providing schools with digital lessons and face-to-face teaching strategies for reading, math, and Spanish — Istation’s online curriculum and flexible teacher tools support diverse instructional approaches, including small- and whole-group instruction for pre-K through 8th grade.

To help ensure your school division’s reopening plan is comprehensive and effective, **contact Istation today** to speak with an educational consultant. Get a customized implementation strategy that incorporates digital and data-based approaches designed specifically to help achieve school division goals.
